Miss Anita Hendrie has returned to this city after an absence of six mouths, completely rehe younger daughters of the Vice President stored to health, and is staying with her mother at 1528 I street northwest.

It will seem very strange on New Year day not to have any official receptions going on, for these events are such a fixture in the Washington mind. The omission of the White House reception on that day has been very rare. In the last twenty years, and in fact since the war, it has only happened twice. During President Grant's term the death of Mrs. Belknap, the first wife of the Secretary of War, died during holiday week, and in respect to her memory the usual reception was omitted. The death of the Hawalian mainister, Mr. Allen, just after the reception of the diclomatic corps twelve years ago during the administration of President Arthur was the reason for the other time that the White House was closed to the public on the first day of the year. The other official receptions were also omitted the moment that the news of the death went the rounds. It is presumed, however, that had Mrs. Morten been in

A FISH PRESERVE.

An Alaskan Island Reserved by Order of The President has issued a proclamation reserving for timber and fish culture purposes the Island of Afognak, Alaska, and its adjacent rocks and territorial waters, including the Sea Lion rocks and the Sea Otter Island. The Secretary of the Interior and the com-

missioner of fish and fisheries, under the direc-

tion of the President, have investigated this subject, and finding that he had the authority by law, strongly recommended that the action should be taken. The commissioner of fish and fisheries has selected Afognak bay and Afognak river, lake and the tributaries thereof, with a mile of land from the shores of the river and lake, for the purpose of fish culture under the statute authorizing him to do so, and this is included in the proclamation of the President. The whole comprises a national reservation, and all trespassers are required foremove therefrom. There is a cannery on the island that will have to be vacated, but those of the former subjects of Russia there, a few in number, will be protected in should be taken. The commissioner of fish there, a few in number, will be protected in whatever rights they might have under the Russian treaty. This reservation is one of the most important yet made. The salmon and trout crowd the Afognak river at the breeding season, so much as to actually press some out upon the shore, and there is no doubt that by preserving it it will become a breeding place for all the other will become a breeding place for all the other waters of Alaska and the different rivers of the United States in all the future; whereas, if it had been left to the depredations already commenced upon it, the fish there, as they have elsewhere in the United States, would become

utterly exterminated. There is a prospect that the sea ofter may also be preserved there and it may be other sea animals. This is a beginning of a series of reservations in this direction that will preserve the fish and animals of the sea as have been preserved the deer, elk, buffalo and other animals of the United States and the national

HE HAD CATARDH AND KIDNEY TROUBLE.

One of our oldest and best known citizens, Mr Richard Reeder of 1834 7th street northwest, has been afflicted with catarrh and kidney trouble a great part of the seventy-one years of his life. Recarding his case he says: "I suffered from sleeplessness, loss of appetite, headaches, spots before my eyes, a feeling of fullness in my forehead, noises in my ears, frequent colds, nose alwas a stopped up. I could not go to sleep easily and never felt refreshed after sleep. I had dizzy

spells, unpleasant dreams, my throat was always dry spells, unpleasant dreams, my throat was always dry except when mucus dropped into it, which caused me to hawk and spit to clear it, my stomach bloated and I felt oppressed after eating. I also had heartburn—felt a sense of pressure about the heart and was short of breath after exertion, in addition to which I had a kidney trouble from which I suffered constantly.

'I often tried to get cured, but failed until I called on the Mackenzie Medical Institute, and I improved from the start. I now eat and sleep well, have no hearaches, no dizzy spells, my stomach gives me no trouble, my nose is not stopped up, because the doctors REMOVED 23 POLYPI
